

Stranger To Me

C **F**
I wasn't prepared I didn't know what you could do for me

C **F**
Got so scared I couldn't feel, didn't want to see

C **F**
That it was real, real as the darkness now surrounding me

C **F**
I let it explode, I lost hold of who I could be

C **G** **F**
Chorus: And now the stars in the sky beg me to stop and wonder
why

C **G** **F**
And the sign on your street don't look the same to me

C **G** **F**
I could live, you could try to forgive this change and I

C **G** **F**
Don't want you to be a stranger to me

I was tossed, you got lost on Providence Road
Was in the spring, didn't mean a thing after the air got cold
Woke up alone, how could you know, you were never told
Did our hearts turn to stone, did we cut to the bone or were we just
sold?

G **C** **F** **C**
Bridge: Did you ever wonder what I was going through?

G **C** **F**
C
When I heard the winter thunder and each sound called me to
you

G **C** **F**
C
Don't you know I'm lost here whipped by the wind and the
sand

G **F**
G
The long black shadow crossed here left me alone on this land

There's a bend in the road, or so I've been told all roads must end
Been caught in a dream, or so it would seem I could pretend
That I had a new heart, that we had a new start and we could defend
This confused love, but it's not enough to be your friend (cho.)
